Simple Secure Email for the Desktop

DataMotion's SecureMail is a service that protects all important information flowing between you, your business partners, and your clients. At the same time, it makes life easier for everyone. From the moment you hit the "Send Secure" button, until your mail is delivered, sensitive messages and files are fully protected. It's simple. It's fast. It's smart. SecureMail is perfect for organizations of all sizes.

Compliance without Complication

Secure email is a legal requirement for those who must comply with privacy regulations like HIPAA, HITECH, and PCI. With SecureMail, compliance is achieved without complication. It protects all of your sensitive messages with compliance-grade encryption (FIPS 140-2), and it gives customers assurance that their private information is being handled with care. Messages and files are secured with one-click and with instant confirmation when they have arrived safely. Replies are securely delivered to your inbox and unencrypted automatically, ready to read without additional steps. For those that prefer a portal, local language is automatically detected. And, because it works with popular email clients such as Outlook, it's intuitive for senders and recipients, and can be up and running in minutes with no outside IT support. The SafeTLS feature makes it easy for member recipients to receive SecureMail messages and attachments directly to their email inboxes – no passwords, portals or logins required.

Better Customer Service and Lower Costs

SecureMail improves response time and saves money. Your customers no longer have to wait for the mail to get passwords and other sensitive information. And, communications don't stop when people are on the move. SecureMail works just as effectively with mobile devices. Since SecureMail provides confidential delivery with confirmed receipt, it replaces costly faxes, printing, postage, and courier services providing you with a greener and less expensive alternative.

> "SecureMail streamlined the way we work, resulting in increased productivity and happier members. It enables us to compete with much larger organizations."
