

Achieve CJIS Compliance for Microsoft Office 365 Email Encryption

DataMotion™ SecureMail for Microsoft Office 365 allows encrypted email and file attachments to be sent from Office 365 without the need to install special apps or exchange encryption keys. Organizations can use the SecureMail service with Office 365 to easily and safely exchange sensitive emails and files with customers, business partners and vendors while maintaining compliance with privacy regulations including CJIS requirements.

Features
Strong, compliance grade encryption for email content and file attachments, including CJIS
100% compatible with on-premises or cloud-based archiving systems
Automated account provisioning for your message and file recipients
On-demand and automated reporting for all secure transactions
Includes SecureContact.me signature line link for receiving encrypted messages and files from anyone
Step-by-step setup guide for quick service startup and operation
Benefits
Securely transmits Office 365 email and file attachments to protect against loss, theft or misuse
Reduces exposure to regulatory violations by enabling compliance with CJIS, PCI-DSS and HIPAA
Improves service and contains costs with secure email speed and cloud computing efficiency
Lowers business risk and protects your brand and reputation by preventing data leaks
Increases customer loyalty and trust by protecting their sensitive information with encryption

/Solution Brief

How It Works

The diagram below provides an illustration of how easily SecureMail is integrated with Microsoft Office 365 for CJIS compliance.

DataMotion SecureMail Desktop uses an ad hoc Outlook ‘Send Secure button’ to encrypt sensitive email and attachments using AES 256 encryption at the desktop. Once the message is marked as secure, it is routed through O365 and stored on the DataMotion SDX Platform in the Agency’s CJIS Data Center. Recipients are sent a notification email from the sender with instructions to retrieve encrypted email and attachments from the DataMotion SDX platform (which is co-branded for the Agency).
